WORK EXPERIENCE

Software Developer — Full Stack

Aug 2022 – Dec 2025

Fábrica de Tecnología (Conectera) · Bucaramanga, Colombia

- **Designed and shipped end-to-end** a budget and purchase order management system with multi-step approval flows, giving finance and operations teams direct real-time visibility into company spend.
- **Integrated 5+ third-party RESTful APIs**, enabling seamless data exchange with external platforms — zero service interruptions across all integrations.
- **Optimized high-traffic MySQL queries** across key application modules, producing measurable reductions in load times and server overhead.
- **Built and maintained applications in PHP/CodeIgniter and JavaScript**, contributing across the full product lifecycle: scoping, development, QA, and incident resolution.
- **Partnered directly with business stakeholders** (finance, operations, product) in agile sprints — translating ambiguous requirements into precise technical deliverables with minimal iteration.
